

# TRAINING WORKSHOPS FOR PERTH

**Best of Agile Methodologies (2 days)** - \$1,290 (\$1,150 ACS – 21 PCP hrs\*)

12-13 Oct

Examines the primary agile methodologies (XP, FDD, Scrum, RAD/JAD, etc) revealing the differences in techniques, outputs and workflow. Then a closer examination of the various agile techniques considered the best is undertaken, through six real-world case-studies and four workshop exercises.

*“Real world knowledge of the presenter, willingness to provide extra information and insight... a real sense of wanting to see us succeed...”* Karl Schweitzer, Development Manager, Oracle

*“[I liked/learnt] use cases, class diagrams, XP iterations and releases, general workflow of agile methods”* George Benko, Software Engineer, MetOcean Engineers

**Req. Analysis: JAD to Prototype (1 day)** - \$690 (\$615 for ACS – 10 PCP hrs\*)

19 Oct

This course focuses on five of the key techniques that ensure the scope of a system actually meets the user’s requirements. A practical mini-JAD (Joint Application Development) session is conducted with the class, as well as workshop exercises in Use Case analysis, Domain Object Modelling (DOM), scenario scripting and user interface prototyping.

*“ [I liked] doing the role play of JAD session.”*  
Andrew Mercer, Web Developer, REIWA

*“Working with the client is probably the most important message. Domain expert constant involvement”* Mike Gardiner, Developer, Bright People Technologies.

**OO Principles & Patterns (1 day)** - \$690 (\$620 ACS members – 10 PCP hrs\*)

20 Oct

Two fundamental aspects of designing object-oriented software are explained – OO Design Principles are the underlying guidelines for all OO designs; and Design Patterns are the essence of reuse (and good OO design by example). A range of principles and patterns are presented with two workshop exercises undertaken to cement this understanding.

*“I learnt how to apply design patterns, was fun, good balance of theory and practical workshops”* James Ioppolo, Software Eng. – Immersive Technologies.

**Software Architecture (2 days)** - \$1,290 (\$1,160 ACS – 21 PCP hrs\*)

25-26 Oct

An advanced workshop giving practical insights into “architecturally centric” software development. Real world and analogous examples are reviewed as well as eight group-based exercises undertaken.

*“Love the workshop session where there is more interaction for better understanding”,* delegate, Intel Corporation.

*“Design patterns / combining architectural patterns. I enjoyed the fact that everything taught had a clear benefit to the SDLC”,* Jeremy Martin, Snr Software Developer, LanWest.
